Continuous & Fully Automatic Neem Seed Drying Plant

Benefit :

- Manual platform drying is not required hence manpower & time is saved.
- Neem Seed can be dried in moist weather when natural sun drying can be done properly.
- Suitable moisture level can be maintained.

Special features :

- Continuous & Automatic operation.
- Auto temperature controlling system.
- Uniform drying.
- Highly energy efficient.
- Low power demand.
- Closed operation.

Operating principle :

Hot air is produced from the hot air generator or steam supplied by the boiler. Hot air is passed through the moving porous belt on which the pulses are conveyed. The moisture is transferred from the wet pulses to the hot air. The material becomes progressively dry as it traverses along the length of the belt conveyor.
